* This is based on your choice to add a custom design and which custom design option you select

Ignite - Custom Design - Our most popular design package, Ignite is ideal for small-to-medium sized ministries building their first website. If you already have a web presence, Ignite can take it to new levels to showcase your organization's mission, vision, and personality.

Ignite is a streamlined process that allows you to create the custom content elements, navigation, and design of your new website. Our professional designers listen to your ideas and incorporate your vision. Your design can include one animated Flash presentation and other unique features that will set your ministry apart.

Illuminate - Custom Design - Illuminate is a powerful and dynamic design package that creates a fully customized website design. Illuminate will help you reach your target audience and look amazing while doing it.

Illuminate is the preferred design solution for larger churches and ministries ready to upgrade a current website, especially if they wish to benefit from a process of consultation, dialogue, and feedback.

Logo design is not included in Ignite and Illuminate. We have 3 Logo design options available at \$300, \$500, and \$800. Custom programming is available on a case by case basis as decided by Elexio. Channels are set areas in the website design where you select the specific news or information that is updated automatically.
